

Statistics for Spokane Midwives from 6/95 through 12/11

Clients accepted for care:		1671	
Terminated care, non-medical reasons:	197		
Spontaneous abortions:	77		
Clients remaining in care:		1397	
Medical referrals:	61		
Began labor out of hospital:		1336	
Transports to hospital in labor:	122		9.1%
Total delivered out of hospital:		1214	
Transfers of newborns:	34		2.5%
Transfers of women postpartum:	15		1%
<hr/>			
Reasons for medical referrals (61)		Reasons for intrapartum transports (122)	
Twins / Breech	13	Preeclampsia	1
Placental anomaly/fetal distress	2	Desire for epidural/psychological:	20
Maternal health problem		Perceived MW wouldn't make it:	5
Not related to pregnancy	10	CPD	22
Hyperemesis:	1	Obstructed labor 2* malpresentation:	26
PIH/Preeclampsia	9	DVT on heparin, planned hospital	1
Late care/anemia/GBS+/IUGR:	1	Breech:	7
Fetal anomaly/death	5	Failure to progress/mat exhaustion:	23
Gestational diabetes:	2	Failure to progress/macrosomia:	5
Rh sensitized	1	Preterm birth	8
Molar	1	Premature Rupture of Membranes	1
Fever	2	Thick meconium	1
Preterm ROM	7	Previa/bleed	1
Abruption	6	Active Herpes	1
Deep Vein Thrombosis	1	Fetal Distress	1
		Abruption	0
<hr/>			
Reasons for newborn transports (34)		Reason for postpartum transport (15)	
MAS: (NICU 3+ wks)	3	PPH 2* retained placental pieces:	11
Anomalies:	12	MW missed birth, EMTs took in	1
Respiratory distress:	11	Laceration repair	3
Transient tachypnea: (immediate D/C):	2	VBACs – total	77
Sepsis:	4	Repeat C/section	11
Jaundice	1	VBAC success rate	86%
Failure to thrive	1		
<hr/>			
Type of delivery (n=1336)		Vaginal Trauma (n=1263)	
Spontaneous vaginal:	1257	Intact:	909 72%
Forceps/Vacuum:	6	1st degree:	305 25%
C-section:	73	2nd degree:	45 3.5%
C/S rate	5.4%	MLE:	11 <1%
		3 rd degree	3 <<1%
		Rectovaginal fistula	1
<hr/>			
Parity (n=1336)		% Transports in labor by parity	
P0:	351	P0 transported:	77 22%
P1-3:	746	P1-3 transported:	34 4.5%
P>3:	239	P>3:transported:	9 3.7%
<hr/>			
Maternal Deaths	0	Perinatal Deaths	4 (trisomy 13 & 18, SIDS, stillbirth)
